

Troubleshooting: How to Align Objects

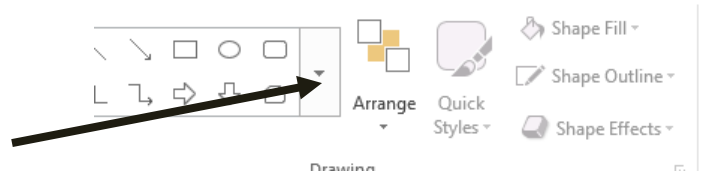

***These instructions are designed for PC Users PowerPoint 2013 version 18. If you are using a different version it may look slightly different. ***

1. Select one of your images or shapes. Hold down the “**shift**” key and select the other shapes in your slide.

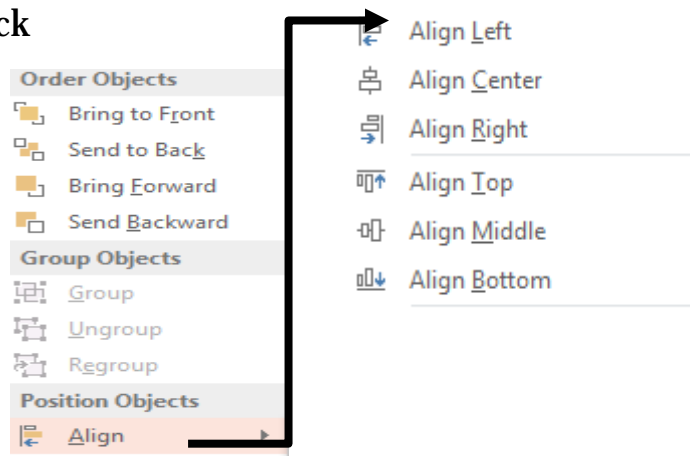

Dots will appear around the shapes when they are all selected.

2. Let go of the “Shift” key and click “**Arrange**” at the top of your screen.

3. From the drop-down menu click “**Align**” and then “**Align Left.**”

4. Your shapes are now aligned to the left of the screen.

Congratulations! You have successfully completed this step.
