

Troubleshooting: How to Arrange Objects

***These instructions are designed for PC Users PowerPoint 2013 version 18. If you are using a different version it may look slightly different. ***

1. Locate the textbox hidden behind the shape and click on the area that is visible.

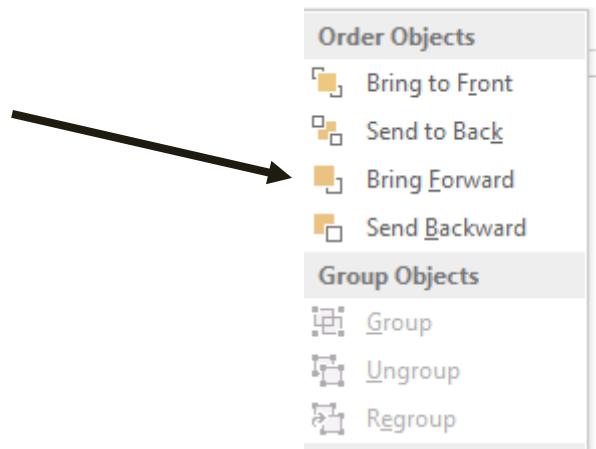

Once selected dots will appear around the text box.

2. Click “Arrange” located at the top of your screen.

3. From the drop down menu click “Bring Forward”

4. Your text box is now unhidden and should look like this.

Congratulations! You have successfully completed this step.
