Troubleshooting: How to Distribute Objects
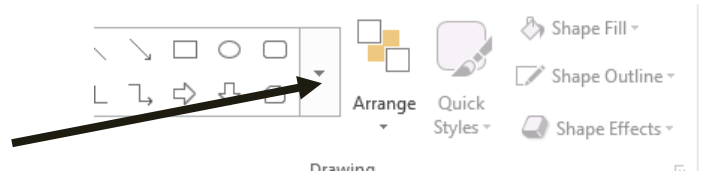

1. Select one of your images or shapes. Hold down the "shift" key and select the other shapes in your slide.

   *Dots will appear around the shapes when they are all selected. *
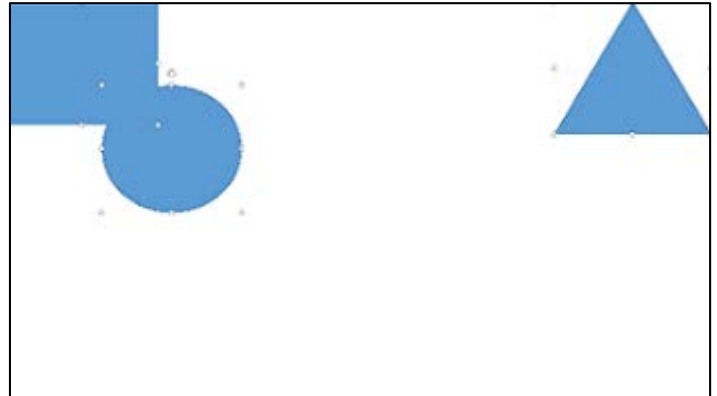

2. Let go of the "Shift" key and click "Arrange" at the top of your screen.

3. From the drop-down menu click "Align" and then "Distribute Horizontally."

4. Your shapes are now evenly distributed across the screen.

   Congratulations! You have successfully completed this step.
