

Troubleshooting: How to Group Objects

***These instructions are designed for Mac Users PowerPoint 2011 version 10.4 If you are using a different version it may look slightly different. ***

1. Select one of your images or shapes. Hold down the “**shift**” key and select the other shapes in your slide.

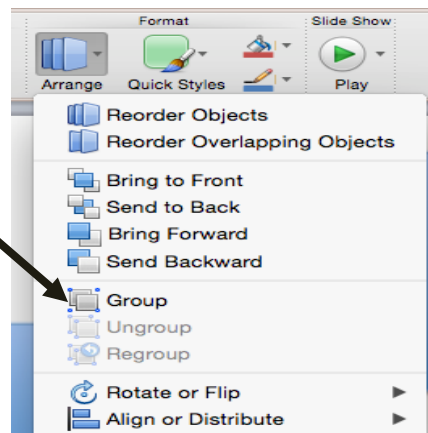

Dots will appear around the shapes when they are all selected.

2. Let go of the “**Shift**” key and click “**Arrange**” at the top of your screen.

3. From the drop-down menu click “**Group**.”

4. Your shapes are now grouped into one image. Move your image around to test this out.

Congratulations! You have successfully completed this step.
